Experience

Software Engineer

Travelers - Hartford, Connecticut

12/18 - Present

- Managed and developed full-stack functionality for Travelers' primary customer-facing applications, primarily working with Java (Spring) and Java-based templating engines (Velocity, FreeMarker).
- Implemented responsive user interfaces and experiences based on supplied wireframes.
- Educated and managed multiple teams on quality, user experience, and accessibility.
- Processed server-side XML for controlling user flow, data presentation, and displaying partner offers.
- Assisted in early design and development of new customer-facing applications based in Node and React.

Founder

Big Boys NYC - Remote

08/18 - Present

- Developed web applications with web3.js for proprietary and client use on the Solana blockchain.
- Managed operations for multiple non-fungible token projects with 10k+ combined users.
- Designed technical systems and provided operational support for partners and clients.

Creative Technologist

Digital Surgeons - New Haven, Connecticut

11/17 - 05/18

- Developed client retainer projects with Wordpress and Craft CMS with SQL and No-SQL databases.
- Observed BEM syntax, PSR-2, and ADA compliance for consistent and effective collaboration.
- Invented novel marketing analytic reporting tools with Node, three.js, and sentiment analysis libraries.
- Optimized embedded media and worked heavily with the creative team to create engaging experiences.

Founder

Pilone Consulting - Middletown, Connecticut

08/16 - 11/17

- Independently bootstrapped a financially successful digital agency that serviced 10 regional businesses.
- Development Wordpress applications for clients in education, entertainment, and multimedia industries.
- Designed, implemented, and monitored social media advertising campaigns.
- Created and implemented marketing strategies that increased and retained digital engagement nearly 40x.

Software Engineer

Digilant - Boston, Massachusetts | Remote

12/14 - 08/16

- Developed core application functionalities in a legacy Symfony2 and extJS ad buy portal.
- Proactively modernized the platform by integrating new JavaScript frameworks.
- Architected and developed core functionalities of a new B2B enterprise-level platform.

Software Engineer - Co-op

Ology Media - New York City, New York

01/13 - 07/13

- Developed full-stack functionality for an early stage, Laravel-based, social network (<50k users).
- Effectively led the development team for 6 weeks during our manager's absence.
- Managed public relations and content creation for the Ology Gaming network of 500+ users.

Education

Northeastern University

B.S. Computer Science and Game Design, cum laude
